PERSONAL PROFILE

Computer Science student and Software Engineer with hands-on experience across product development, UI/UX design, and full-stack engineering. Proven ability to turn business requirements into technical solutions while leading cross-functional teams under tight deadlines. Proven track record of owning projects from ideation through delivery.

EDUCATION

UNIVERSITY OF MAKATI – BS Computer Science (Major in Application Development) Expected 2027

- General Weighted Average (GWA): 1.11, 2023 – Present
- Consistent Dean's Lister, 1st Year – 3rd Year, 2023 – Present

Relevant Coursework: Software Engineering, Object-Oriented Programming, Human Computer Interaction

EXPERIENCES

AIKO – Developer & Project Manager Nov 2024 - Dec 2024

- Developed a modular AI-powered career guidance web app by leading a 4-person team using ASP.NET, C#, MongoDB and Gemini API.
- Reduced development time by 50%, by refactoring duplicated UI into reusable ASP.Net Razor components.
- Led to prompt injection mitigation by identifying a vulnerability in the AI chatbot through adversarial QA testing.

SILANGAPP – Developer & Project Manager Feb 2025 – Apr 2025

- Developed a centralized mobile and web barangay management platform by leading a 4-person team using Node.js, React, PostgreSQL and Prisma.
- Secured barangay deployment approval by enforcing sprint deadlines despite limited client responsiveness.
- Improved web's performance by resolving 50% of Axe DevTools violations and optimizing dashboard assets through ARIA fixes, WebP compression and cache optimization.

WE WHO REMAINS – Game Developer & Project Manager Oct 2025 - Dec 2025

- Designed and developed the core gameplay of a 3D multiplayer survival game in Unity using C#.
- Synchronized branching cutscenes and story-driven gameplay across networked players using Photon Fusion.

AWARDS

NATIONAL EGOVPH HACKATHON 2026 – Top 10 Finalist July 2026

- Selected as a Top 10 Finalist out of 270 teams at the 2026 National eGovPH Hackathon for building eHanda, a post-disaster household needs-assessment tool integrated with the eGovPH platform.
- Automated edge-case documentation by translating RDANA 2024 research into PRDs and AI-ready test cases.

UMAK 7TH HACKATHON 2025 – Most Commercially Viable October 2024

- Won 'Most Commercially Viable' out of 13 teams at UMAK 7th Hackathon 2025 for developing a faculty profile management system within 24 hours.
- Independently built the entire frontend, including a resume builder that earned judges recognition for Most Commercially Viable Hackathon Web.

SKILLS

Languages & Frameworks: TypeScript, C#, Python, JavaScript, ASP.NET, NestJS

Development Tools: Git, GitHub, Figma, VS Code, Vercel, Notion, Jira

Core Competencies: Project Manager, Full-Stack Development, UI/UX Design, Quality Assurance & Testing
